## About USGBC and Greenbuild

The **U.S. Green Building Council (USGBC)** is committed to a prosperous, healthy and sustainable future through its LEED green building program. LEED is driving international green building practices, with more than 91,700 projects participating in LEED across 167 countries and territories worldwide and 2.2 million square feet of construction space being certified every day. LEED certification covers a building's full life cycle and has different standards that apply to all building types including office buildings, residential, warehouse, hotels, hospitals, data center etc. Since 2002, USGBC has brought the largest green building conference, Greenbuild, to major international markets. Building on the success of Greenbuild, USGBC North Asia creates International Green Building Symposium in the region, working with most influential industry organizations in local market to accelerate the green movement.

## About International Green Building Symposium Hong Kong

What does a sustainable future mean to the built environment in Hong Kong? While various technology is helping new construction raise its bar from the very beginning, the existing buildings in Hong Kong also hold incredible promise. Highlighting the environmental and economic value of green buildings, the **International Green Building Symposium Hong Kong** brings together regional opinion leaders and green building professionals in all related sectors, aiming to bridge all stakeholders to address the efforts shall be made for a healthy and sustainable built environment in Hong Kong.
